DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schwarz (US Pub No. 2007/0264994) in view of Lucidarme (US Patent No. 7,123,910).

As to claim 9, SCHWARZ discloses a user equipment "Fig. 2B, items 10 UE" in a first cellular mobile communication network (Fig. 2B, items 12 UTRAN), the user equipment comprising: means for retrieving information from the first cellular mobile communication network (par [0020-0021] "where the first cellular mobile communication network are provided as a in the first network UTRAN 12, and second networks 20") about the availability status of at least a range of

services that are provided by said first communication network (par [0021-0022, 0025] "the RNC 14 determines, in response to the indicated capability of the UE whether to operate in the first network and/or other conditions such as service delay, quality of service, bit rate, or requested content to be provided to the UE 10") , means for indicting to said first communication network the priority of a requested service (par [0022, 0025] "note: the priority of a requested service by the user equipment where the RNC network 14 consideration conditions such as service delay, quality of service then redirection to the second network 20, in response to the indicated capability of the UE"). However, Schwarz unclearly discloses range of services wherein more than one services. Lucidarme clearly discloses range of services wherein more than one services (see Fig. 2, 6, col. 8, lines 10-64 "where providing the other network such as GSM network to allowed the message redirection of hand over network based on the request of mobile equipment"). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to provide above teaching by Lucidarme to Schwarz, in order backup or handover access of the networks.

Allowable Subject Matter

2. **Claims 1-8, 12-18** are allowed.

3. **Claim 10** is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
